✓ Why Drops of Sustainable Development?

Sustainable development is one of the key challenges facing Europe today. Adult educators and learners need practical tools, updated knowledge and innovative teaching approaches to support greener lifestyles and more sustainable communities.

The Drops of Sustainable Development project brings together six organisations from five European countries to develop innovative educational resources based on TEAL (Technology-Enabled Active Learning) methodology.

The project aims to:

- strengthen sustainability competences among adult educators
- promote environmental awareness and green skills
- support adult learners in adopting more sustainable lifestyles
- encourage the use of innovative digital learning methods
- contribute to the objectives of the European Green Deal

WHAT WILL WE DEVELOP?

Main Project Results

- Best Practices Guide

A comparative collection of successful examples and approaches in sustainability education across Europe.

- DSD Toolkit

A practical toolkit containing training modules and educational resources for adult educators.

- E-learning Platform

An online learning environment providing access to project materials and training opportunities.

- Interactive Simulation Exercises

Engaging digital activities helping adult learners apply sustainability concepts in real-life situations.

- International Training

A Learning, Teaching and Training Activity (LTTA) for educators and project staff in Zaragoza, Spain.

- Local Pilot Activities

Testing of project resources with educators and adult learners in all partner countries.

First project meeting in Romania

The project officially started with the first transnational meeting in Cluj-Napoca, Romania. Partners from Croatia, Romania, Spain, Italy and Cyprus met to coordinate activities, define responsibilities and plan the development of project results. The meeting laid the foundation for successful international cooperation and implementation of the project.

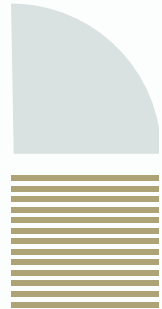

FIRST PROJECT STEPS & PARTNERS

What has been achieved so far?

During the first six months of implementation, the partnership successfully:

- ✓ Created the project visual identity
- ✓ Launched the official website
- ✓ Established dissemination and monitoring systems
- ✓ Organised six national stakeholder events involving 59 participants from educational institutions, NGOs, local authorities and community organisations
- ✓ Started regular social media communication and dissemination activities

Project Partnership

Uzinaduzina – Romania (Coordinator)
Association 4 Elements – Croatia
Petit Pas APS – Italy
ACTA – Romania
STP Consulting – Spain
