FROM PROJECT RESULTS TO REAL-LIFE LEARNING

SUSTAINABILITY EDUCATION IN PRACTICE

Developed, Tested and Improved Together

Over two years of international cooperation, the DROPS of Sustainable Development project has brought together educators, adult learners, organisations and community stakeholders from five European countries.
Building on the development of educational resources, the final phase focused on testing their practical value, collecting feedback and supporting their wider use in adult education.
The project has developed a collection of good practices, an educational toolkit, an e-learning platform and interactive simulation exercises, combining Education for Sustainable Development (ESD) with Technology-Enhanced Active Learning (TEAL).
These resources are designed to make sustainability education more accessible, participatory and relevant to everyday life.

VALIDATION AND PILOT TESTING
Learning from Three Target Groups

The project results were tested and evaluated through activities involving three key target groups:

TG1 – Educators, Trainers and Facilitators
Participants explored the educational materials, assessed their clarity and usefulness, and suggested improvements for practical application in adult learning environments.

TG2 – Adult Learners
Adult learners tested educational content and digital resources, sharing feedback on accessibility, relevance and opportunities to apply sustainability principles in everyday decisions.

TG3 – Stakeholders and Organisations
Representatives of educational institutions, civil society organisations and other stakeholders evaluated the potential of DROPS resources to support local initiatives, community engagement and sustainable development practices.
Their feedback helped partners assess the relevance of project results and identify opportunities for further use.

Bringing DROPS Beyond the Original Target Groups
In addition to the activities with the three main target groups, project partners organised local workshops involving participants who had not previously taken part in the project's testing activities. These workshops introduced DROPS educational resources to new audiences and encouraged discussion about sustainable lifestyles, environmental responsibility and the role of education in creating positive change. Through interactive activities, participants explored practical sustainability challenges, exchanged experiences and discovered opportunities to integrate sustainable practices into their communities.

SHARING KNOWLEDGE, INSPIRING CHANGE

MULTIPLIER EVENTS ACROSS EUROPE

Connecting Educators, Organisations and Communities
During the final project phase, partners organised national Multiplier Events to present the DROPS results to wider audiences.
The events brought together educators, representatives of civil society organisations, local stakeholders and other interested participants.
Through presentations, demonstrations and discussions, participants became familiar with the educational toolkit, e-learning platform, interactive exercises and other project outputs.
The events also provided opportunities to exchange ideas, develop new connections and encourage the continued use of DROPS resources beyond the project partnership.

Policy Recommendations and Stakeholder Engagement

Drawing on project implementation, validation activities and stakeholder feedback, the DROPS partnership developed recommendations to strengthen sustainability education.
The recommendations highlight the importance of accessible learning opportunities, innovative educational methods, digital tools and cooperation between educational organisations and local communities.
They aim to encourage educators, organisations and decision-makers to support the integration of sustainability competences into adult education and community initiatives.

FROM FEEDBACK TO FUTURE ACTION

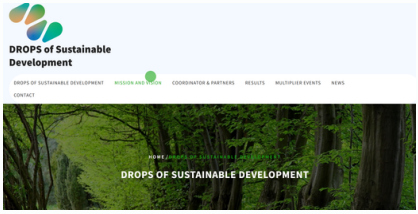

THE DROPS LEGACY
FREE EDUCATIONAL RESOURCES FOR EVERYONE

Explore, Adapt and Use

The end of the project marks the beginning of a new opportunity: putting the DROPS results into practice.
The educational resources are designed to support adult educators, trainers, learners and organisations interested in sustainability education.

Explore the DROPS results:

- Good Practices Collection – inspiring examples of sustainability education from European countries.
- DSD Educator Toolkit – educational modules, activities and guidance for facilitators.
- E-Learning Platform – digital learning opportunities and accessible educational materials.
- Interactive Simulation Exercises – practical scenarios encouraging decision-making and problem-solving related to sustainability.
- Policy Recommendations – proposals for strengthening sustainable development education and community engagement.

SHARING RESULTS

SHARING OUR RESULTS ACROSS EUROPE

The partnership has promoted project achievements through newsletters, brochures, online publications, social media, EPALE contributions, local events and an international online event.
These activities have helped connect project outcomes with educators, organisations and communities across Europe.
The final dissemination phase also encouraged stakeholders to explore the available resources and consider how they could be integrated into future educational activities.

PROJECT PARTNERSHIP
Uzinaduzina – Romania (Coordinator)
4 Elements – Croatia
Petit Pas APS – Italy
ACTA – Romania
STP Consulting – Spain
CCIF Cyprus – Cyprus

Small Steps. Lasting Impact.
DROPS has demonstrated how international cooperation, practical educational tools and active participation can help make sustainability education more engaging and relevant.
Although the Erasmus+ project concludes in October 2026, its educational resources and ideas remain available to support future learning, cooperation and local initiatives.
Discover the resources. Share the knowledge. Inspire sustainable change.
